What does PhD mean?

Waiting for you:

In the beginning
I was quite confused about quite a lot of different issues.

“What is your research question?”

Communicate your idea

Start from problem

**Find an unique
problem for
your topic**

**Don't think
sequentially**

**Think a bizarre
case that
others will say
"it's impossible"**

Finding your idea

I want to make

I try to use this algorithm for

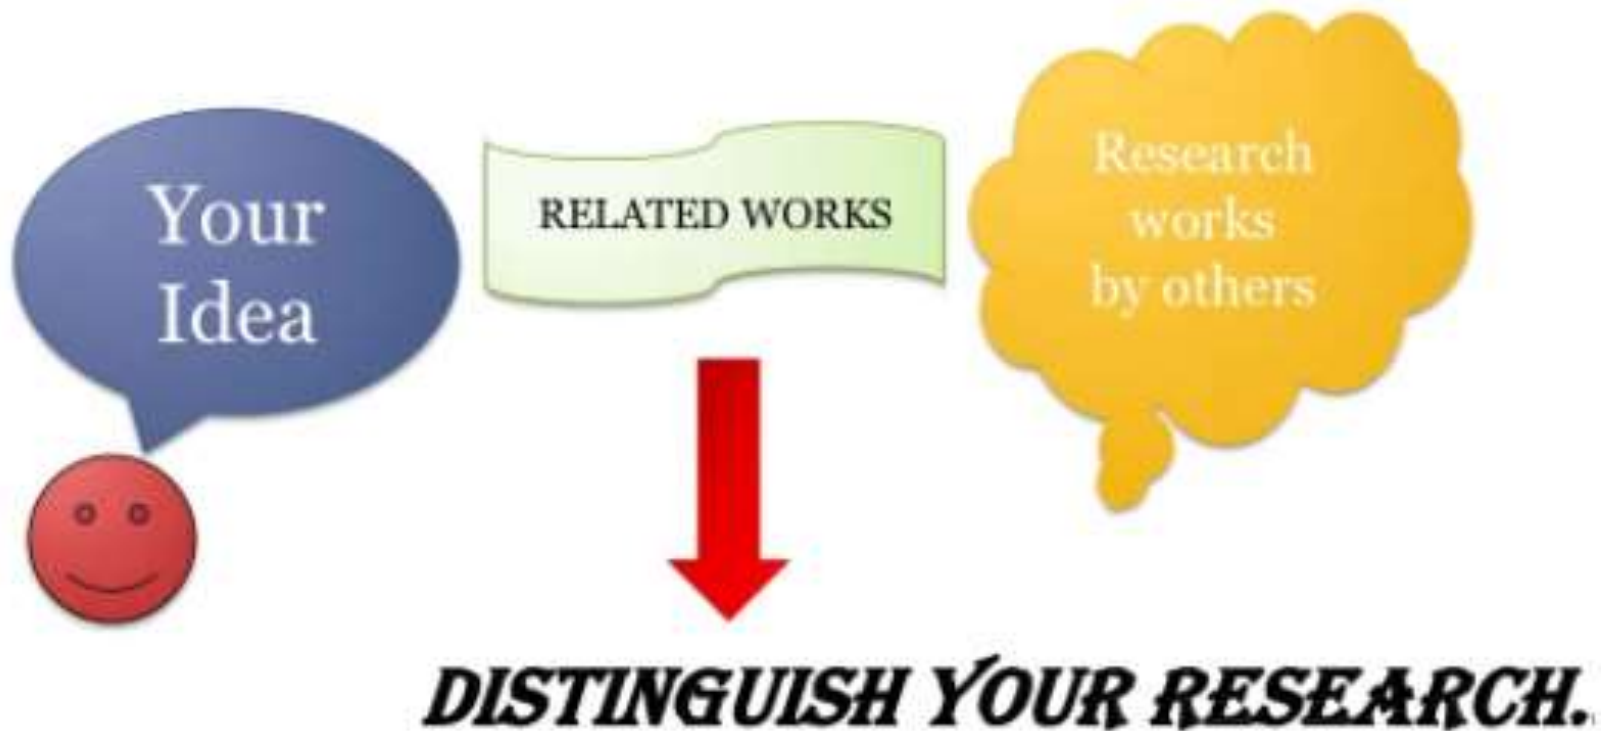

I am interesting to make research in

I develop a new approach to solve ...

Keep track of previous research works

Set a boundary of your research

Fix flow of your research

Create framework of your research

- Your first model to overcome the problem of your research

- Consists of some parts those you can concentrate on work step-by-step

- Easy to understand in order to communicate what you do with your research

- Easy to manage your research by time

Do experiments

✓

- Confirm your model

- Set datasets and parameters

✓

- Analyze your results

- Claim the performance

Systemize your research paper

•Communicate your paper in easier way
to readers

•Keep working and
improving on your research

•Open mind for reviews

•Be honest in writing
your paper

Advising: Students vs/and Research

“Focus on **the students**, since graduating **great students** means you’ll produce great research, while focusing on the research may or may not produce **great students**.”

Nico Habermann
(1932-1993)

David Notkin
(1955-2013)

The effect of ovarian stimulation with human menopausal gonadotropin (hMG) for IUI cycles on anti-Müllerian hormone reserve levels

Supriyatningsih¹
¹ Faculty of Medicine & Health Science, Universitas Muhammadiyah Yogyakarta/ Reproductive Clinic Asri Medical Center Yogyakarta, Fellow in Reproductive Medicine, Yogyakarta, Indonesia

Objective Infertility in Indonesia is increasing. According to a report from the Ministry of Health of Indonesia in 2010, approximately 12% couples in reproductive age have fertility problems. The objective of this study is to analyze the effect of ovarian stimulation with clomifen citrate (CC) combine with human menopausal gonadotropine (hMG) on AMH levels in patients undergoing IUI.
